Designed and made in San Francisco by Gary Waterfield, a former bicycle messenger, the Cargo bag is geared to the young techie workforce indigenous to that city. Crafted of superstrong, water-resistant materials like Ballistic nylon, Indium (an industrial wall-covering) and rubberized PVC, the bag combines the functionality of a briefcase with the trendiness of a bike-messenger tote. Its seat-belt clasp opens and closes with one hand. \$179, through [www.waterfield-designs.com](http://www.waterfield-designs.com).

Messenger bags for your laptop
